## INTRODUCTION

### KHOR

#### What is it?

This is the UI component of the KHQR which can be seen on the intergrated platform such as food delivery, telcom and many more applications.

#### How can the design help?

It helps the users know immediately that it is KHQR when they first seen the component?

#### Where will it be placed?

This will be placed at the payment page or screen, which will be shown for user to scan and pay.

## **GUIDELINES | Appearance**

### KHOR

#### The ratio dimension

Х

У

The card will be the ratio of the card dimension as **20:29.** 

#### Example:

If the width of the component is 100 then the hight will be 145.

#### Shadow

0 0 blur 16 color #000000 opacity 10%

Header 12% of height

Left-Right Margin 10% of height

**Top-bottom Margin** 8% of height

## **GUIDELINES | Empty amount**

### KHOR

#### Empty state / empty amount

When the amount is not input. This will be either using 2 sample above.

- 1. displaying 0 [Currency]
- 2. displaying [Currency]

## **GUIDELINES | Alignment**

### KHOR

Text and QR Codealigned to the left

#### Alignment and Size | Text

The text of **Reciever name** and **Amount** must be aligned to the left.

- Reciever name is 3% in pixel relative to the height of QR Card.
- Amount is 6.5% in pixel relative to the height of QR Card
- Currency is 3% in pixel relative to the height of QR Card

#### Psychology behind the alignment

According to experiment conducted by KHQR team, it is found that the left alignment takes user only a glimsp to see ( $\sim$ 0.5s), while center alignment takes user around 1 to 2s for the understand.

## **GUIDELINES | Fonts**

KHOR

Font usage

## Nunito sans

#### Alignment and Size | Text

The font should be *Nunito Sans*, using the same font may project the same dimension and spacing. Inline height - auto, letter spacing - 0%

- Reciever name is 3% in pixel relative to the height of QR Card.
- Amount is 6.5% in pixel relative to the height of QR Card.
- Currency is 3% in pixel relative to the height of QR Card.

Example: Height of QR Card is 330px => Reciever name, Currency = ~10px and Amount = ~21px

## GUIDELINES | Symbol usage

KHOR

### Symbol usage

You can use Dollar or Riel symbol instead if this is prefered.

## **GUIDELINES | Account number**

### KHOR

Payroll Account | 1800-04086467-17

### KHQR

Devit Houtkeo

#### Account number

An individual might has multiple bank accounts; therefore, there is an account switching for recieving money.

However, the KHQR card is not acceptable for adding account number, you can add your account switching style outside of the same.

## MULTIPLE PAYMENT SCHEMAS

### KHOR

Accepted

#### **MULTIPLE PAYMENT SCHEMAS**

Multiple payment schemas such as Visa, MasterCard, UPI or Paypal should be outside of the KHQR UI card as shown above.

## COLOR

### KHOR

## BAKONG BRAVERY RED

#E1232E RGB(225, 35, 46)

### RAVEN DARK BLACK

#000000 RGB(0, 0, 0)

#### PEARL WHITE

#FFFFF RGB(225, 225, 225)

## **SQUARE DESIGN**

#### **DESIGN GUIDELINE**

The look of it is quite similar to a square, but it is actually a 8:9 ratio design.

The example of using width 400px and 115px 8/9 = 400/450 => 115/130

\*\* Please be sure to put KHQR on medium size widget.

## DEEP LINK FOR BAKONG APP

		9:41		''' 🗩
